28 October 2008

Saturday October 11th was the big day for the youth members and supervisors of the Open youth competition Calculating Centre Berg & Dal.

A visit to Gerard Koopman in Ermerveen. The pigeons may be separated, still there is enough to see at this champions loft.

The group of about 20 pigeon fanciers, supervised by Han Dijkhuis and Rob Hulsegge, arrived around eleven, under ideal circumstances they were given the opportunity to see the lofts. Especially the new loft where Team Koopman performed so fantastically this season, was given full attention. The principles of this loft can be used for any loft! The late bred youngsters that were basketed for the late tour race came back like a TGV around 12.30. All ingredients for an unforgettable pigeon day were present therefore.

The fascination for the icon of the colony 'Kleine Dirk' is huge and all youth members could handle him personally.

Many questions were asked to Gerard and after a sandwich they made a tour pass the breeding boxes in the residence as well as the garage.

Over two hours later and seeing all, the Group returned to Rijssen and surroundings; hopefully richer of an experience and many ideas. Anyway, for Team Koopman it was a very successful day!
